	Statement / Commitment	Having been directly involved in the industry since 1985 I believe I can be of assistance in helping the IIS and the isotope community at large. Having overseen the production of numerous isotopes including reactor, accelerator and stable isotopes I believe I am qualified to serve on this committee. Past terms have been spent chairing and reviewing many scientific sessions within the IIS and ICI. Being involved in the large scale production of accelerator and stable metal isotopes on a daily basis is also of benefit to help understand the needs of the end user within the industrial, medical and research community. It has been a personal goal to broaden the scope of the IIS to other related communities including the International Conference on isotopes (ICI), the
